Subject: Beckenham Place Park

Dear David,

I hope you are enjoying the sunny weekend. I am writing to you on this occasion because I assume you are also responsible for the upkeep of Beckenham Place Park about which there are currently two issues.

[REDACTED]

The river bank walk running parallel to the cycle track through the park

Following the storms last year three trees have fallen and blocked the path. Many residents very much enjoy walking along this path but are hampered by the trees and we should be grateful if you could arrange for them to be cleared. (I am sending multiple pictures but there are in fact only three fallen trees across the path)

The first two pictures in particular show that one tree is causing a substantial obstruction to the flow of the river itself and as such I am also sending information about this obstruction to the Environment Agency

With best wishes
