

To Jessica Newman

Millwall Football Club

21 May 2014

Dear Jessica,

Thank you for arranging for the knotweed to be sprayed – the results are obvious and had the beneficial effect of also treating some of the knotweed in the grass verge on the other side of the fence.

I would mention however that some knotweed in the main patch was missed and there is a further significant clump of knotweed about 10 to 20 yards to the east of the main clump which has not been treated at all.

I do hope this helps and thank you again for attending to the matter.

Best wishes

---

RESULT: We brought Millwall's attention to a patch of knotweed next to the path in Warren Avenue Playing Fields and it is now being attended to.
